

Water Stewardship: efforts to conserve water, reduce runoff, and promote clean, healthy waterways

Storm Water Management: This subcommittee may assess, monitor and propose policies, programs and corrective actions to prevent and mitigate storm water runoff and associated damage within the Township of Lower Gwynedd, including educating the township's residents, businesses and institutional organizations about storm water management issues and strategies to mitigate runoff and nonpoint source pollution.

Water Quality/PFOS: This subcommittee's mission is to provide technical resources to the Board of Supervisors concerning PFOS and other water quality concerns in a way that allows them to make better, more educated decisions so that all residents of Lower Gwynedd benefit.
