

AN EXELON COMPANY

December 2025

Dear Customer,

We previously communicated with you in October 2025 that we are upgrading electric infrastructure in your community. Due to unforeseen circumstances, the project has been delayed. The project is expected to begin in early January 2026.

We are contacting you about an upcoming project occurring in Lower Gwynedd Township that will enhance the local electric distribution system. This project is a \$886,000 infrastructure investment in your area to help withstand more frequent and damaging storms, improve reliability by reducing the frequency of outages that cannot be prevented, and support the adoption of cleaner energy resources such as solar and electric vehicles.

**About the project:**

- We will be upgrading and installing new, innovative equipment, including new poles and tree-resistant aerial wires.
- Advanced devices will be installed that can stop the flow of electricity if a problem occurs and automatically restore electricity where possible.

**What you'll see during this project**

- We anticipate that tree removals and tree trimming work will be required.
- Work will occur along Evans Road, Sumneytown Pike, Brushtown Road, Forest Avenue, and Sunset Drive.
- All work will be performed by PECO crews and qualified PECO contractors.
- We have developed a plan to minimize direct customer impact as much as possible and to complete the project in a safe and timely manner.

Tree work is anticipated to begin in early January 2026. Work on electrical equipment, including poles and wires, is scheduled to start once tree work is complete. The project is expected to be completed in late May 2026.

Crews may need to temporarily interrupt electric service to safely complete some of this work. We will work with customers to ensure they are informed in advance of our activities and any planned interruptions. To ensure you receive all outage updates, please confirm that your phone number is accurate in our system through MyAccount at [peco.com/myaccount](http://peco.com/myaccount) or by calling PECO at 1-800-494-4000.

If you have any questions regarding the details of this project and how it may impact you, please contact Brianna Ferrell, Customer Liaison, at [Brianna.Ferrell@exeloncorp.com](mailto:Brianna.Ferrell@exeloncorp.com).
