

September 15, 2026

Dear Customer,

We are contacting you about an ongoing project occurring in Lower Gwynedd Township that will enhance the local electric distribution system. This project is part of our continued investment in your community to strengthen the electric system, prevent customer outages, modernize the electric grid, and reduce the impact of extreme weather on electric infrastructure.

About the project:

- We will be upgrading and installing new, innovative equipment, including new poles and tree-resistant aerial wires.
- Advanced devices will be installed that can stop the flow of electricity if a problem occurs and automatically restore electricity where possible.

What you'll see during this project

- We anticipate that tree removals and tree trimming work will be required.
- Work will occur along Brushtown, Evans, and Welsh roads; and Sumneytown Pike.
- All work will be performed by PECO crews and qualified PECO contractors.
- We have developed a plan to minimize direct customer impact as much as possible and to complete the project in a safe and timely manner.

Timeline

Tree work has been completed.

Electrical equipment work, including poles and wires

- Is ongoing.
- The project is expected to be completed by the end of 2026.

Crews may need to temporarily interrupt electric service to safely complete some of this work. We will work with customers to ensure they are informed in advance of our activities and any planned interruptions. **To ensure you receive all outage updates, please confirm that your phone number is accurate in our system through MyAccount at [peco.com/MyAccount](https://www.peco.com/MyAccount) or by calling PECO at 1-800-494-4000.**

If you have any questions, please contact **Brianna Ferrell**, Customer Liaison, at Brianna.Ferrell@exeloncorp.com.

Sincerely,

PECO
